

THE SSB SUCCESS STORY

CUSTOMER SUCCESS CASE

SSB

"With BVQ it was only a small effort to achieve excellent load distribution on our different storage tiers.

The root causes of performance problems are easy to find can often be solved with some movements in the storage".

Alexander Müller, responsible for storage and supply, Stuttgarter Straßenbahn AG

The SSB, Stuttgarter Straßenbahn AG, is one of the largest and most modern transport operators in Germany and has won numerous awards for its achievements in recent years.

CUSTOMER REQUEST

A solution to optimize load and performance of the virtualized storage environment (SVC)

ADVANTAGES WITH BVQ

Automatic performance analysis in the background

Clear presentation of Performance / capacity utilization and history

Performance of different layers like application storage system etc.

Identification of high performers

Supports process to re-balance a storage system
